#BeAble

This is to certify that Pranjal Singh , Khalid Ansari , Sanjesh Kumar , Neelanshu Singh ,  
Vaibhav Pratap Singh students of B.Tech (CSE) 3rd year has successfully

Completed the MINI PROJECT named RESTAURANT MANAGEMENT SYSTEM on Web  
Development under the Guidance of Ms. Priya Agarwal.

During 2020-21.

Signature:

Ms. Priya Agarwal

(Mentor) Year: III

# **SYNOPSIS**

## **PROJECT TOPIC: RESTAURANT MANAGEMENT SYSTEM**

**Group No. :**

**Project Group Members:**

- |  |                                |
|--|--------------------------------|
| 1) Pranjal Singh (K – 40 / 181500479)        | 2) Khalid Ansari (181500322)   |
| 3) Sanjesh Kumar (K - 53/ 181500620)         | 4) Neelanshu Singh (181500419) |
| 5) Vaibhav Pratap Singh (I – 58 / 181500775) |                                |

**Supervised By:** Priya Agarwal Mam (Technical Trainer)

### **About the Project:**

#### **4.1 Customers Online Ordering and Reservation Module:**

The users should log in restaurant .after successful login and order the food in that particular restaurant. Then order option after this he should enter the payment option.

#### **4.2 Admin module:**

Admin should log in and he can upload the menu items like breakfast lunch dinner. .

#### **4.3 Menu adding Module**

Customer registration module contains customer's information such as customer personal information and other information related to that customer.

#### **4.4 gallery section**

Based on food or everything about the restaurant, customer can send any suggestion or comment to the restaurant with feedback form.

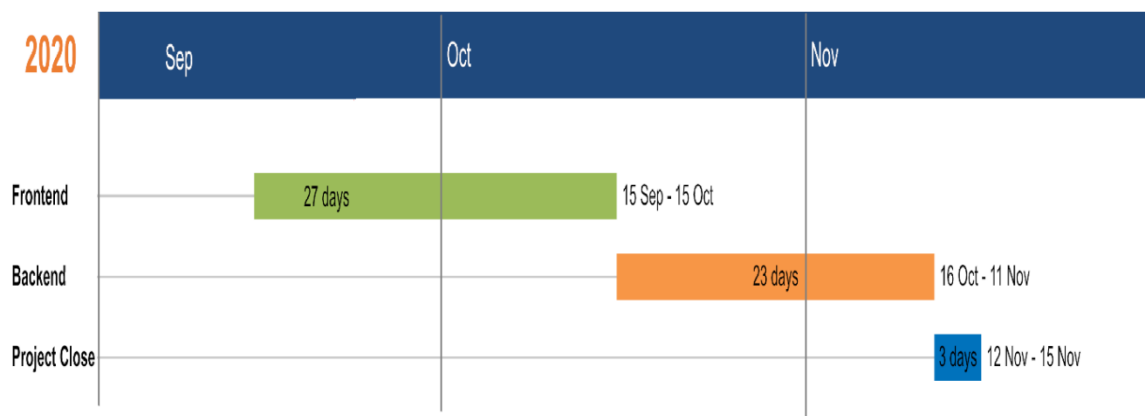

## Motivation:

This project to facilitate customer for make online ordering and reservation on a single finger tap. The online restaurant system can handles management of finances, management of employee scheduling, and the customer orders and their preferences. This website having a frontend with eye attractive designs and easy to operate by any layman.

## Project Planning:

- In first phase we will complete our frontend by 15 October.
- In second phase we will complete our frontend by 12 November.
- In final phase project will complete to execute.

### Gantt Chart

## Tools required:

- **Hardware Requirements:**  
4GB RAM, 10GB ROM, i3 (or above) processor.
- **Software Requirements:**  
Visual Studio Code, Sublime Text Editor, Git.

**Signature of Project Guide:** \_\_\_\_\_

## **ACKNOWLEDGEMENT**

I would like to express my sincere gratitude to my training instructor for providing their valuable guidance and suggestions throughout the web development training. Also want to thank the Udemmy Online Courses which helped me to learn this new technology.

I work passionately towards the Mini project to polish my skills till it shines well. Lastly, I just want to thank my mentor Ms. Ms. Priya Agarwal who keep motivated me on supporting throughout my project and help our team at very moment.

## **ABSTRACT**

Restaurant Management System is a web application to restaurant management in an ease way. This system wake to provide a better service facility to restaurant and also to the customer. The Online system provide facility like food ordering to the Customer through online system, information management, menu Management, admin login and view all orders. Admin Here can add food items to the restaurant List and view all food orders by customers.

With this online web application Food ordering and table reservation management it become easier To replace the traditional system even difficult to store the records for long period of time. We are Using the method of Prototyping model during the development of Restaurant Management System.

## **1. INTRODUCTION**

In Restaurant Management online system, we'll learn the systematic process of Running a Restaurant—by ease into ordering food. This web application; Managing Food item list; food Safety and hygiene; customer relations; marketing; Using a Point-of-sale system; scheduling Reservation of table efficiently; and Dealing with great customers enthusiasm.

Restaurant Management will prepare you for a steady business career, whether you Plan to arrange a fast food franchise, operate a casual sit-down restaurant, or Oversee a fine-dining establishment.

## **Objective:**

The purpose of this project is to learn the basic concepts and practical techniques in web development, to know how to implement the knowledge in its practical manner. The restaurant business and help customer for online ordering and reserve table. To manage the Restaurant more effectively and efficiently by computerizing meal ordering, billing and table Reservation.

## **2. Software Requirement Analysis:**

### **Define the problem:**

There are many restaurant now also manage their business by manual especially take customer ordering. Today, restaurant counter takes the customer ordering manually with using paper. This is problem for restaurant owner to calculate and reckon the total profit on one click.

### **Define the modules and their functionalities (SRS):**

- 1) Menu module – In this segment any customer who wants to order food of their liking can pick any food items.
- 2) Order module – In this module registered customers can order food of their liking by checkout button.
- 3) Gallery module - In this module customers can look of the selective photo session of cuisine.
- 4) Cart module - In this module customers can add booked order food and move forward to pay for it.
- 5) Admin module - In this segment any ADMIN has to first login and then can upload the food items or could alter the orders of the customers.
- 6) Food Deletion module – In this segment Admin with login in can delete order he wishes to delete from database.

## **Technologies used:**

**HTML:** Hypertext Markup Language is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript.

**CSS:** Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

**BOOTSTRAP:** Bootstrap is a free and open-source CSS framework directed at responsive, mobile-first front-end web development. It contains CSS- and JavaScript-based design templates for typography, forms, buttons, navigation, and other interface components.

**PHP:** PHP code is usually processed on a web server by a PHP interpreter implemented as a module, a daemon or as a Common Gateway Interface (CGI) executable. On a web server, the result of the interpreted and executed PHP code – which may be any type of data, such as generated HTML or binary image data – would form the whole or part of a HTTP response.

**MySQL:** MySQL is an open-source relational database management system (RDBMS). A relational database organizes data into one or more data tables in which data types may be related to each other; these relations help structure the data. SQL is a language programmers use to create, modify and extract data from the relational database, as well as control user access to the database.

**JQUERY:** JQuery is a JavaScript library designed to simplify HTML DOM tree traversal and manipulation, as well as event handling, CSS animation, and Ajax. It is free, open-source software using the permissive MIT License.

### Hardware Requirements:

- Memory [4GB RAM (or higher)]
- Intel core i3 – 8<sup>th</sup> Gen 64-bit Processor (or higher)

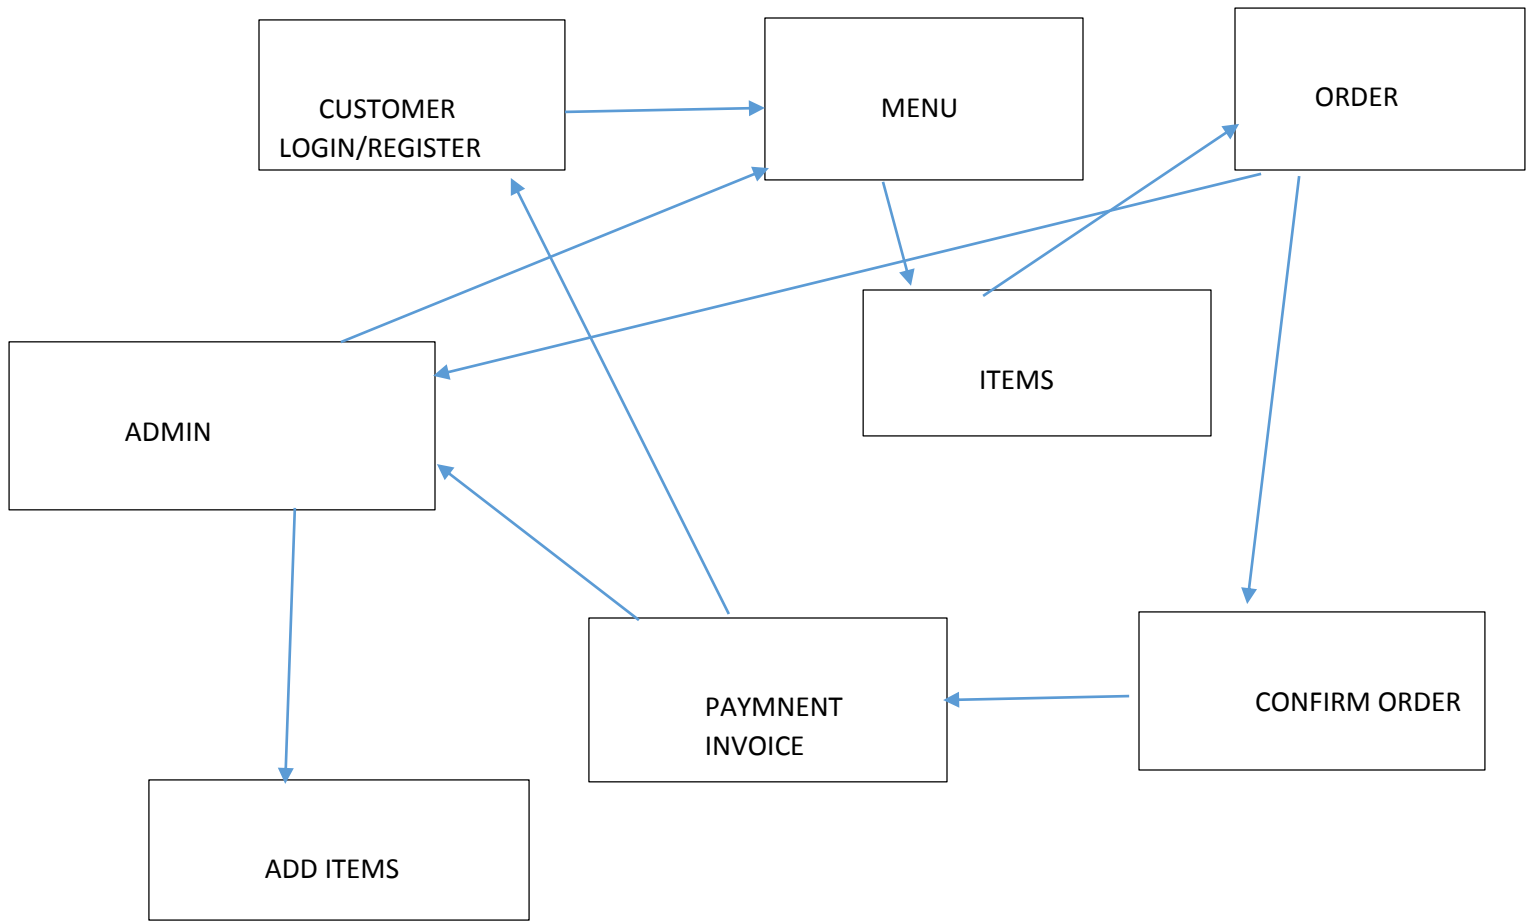

### Software requirements:

- Xampp server
- Visual Studio Code
- MySQL Databases

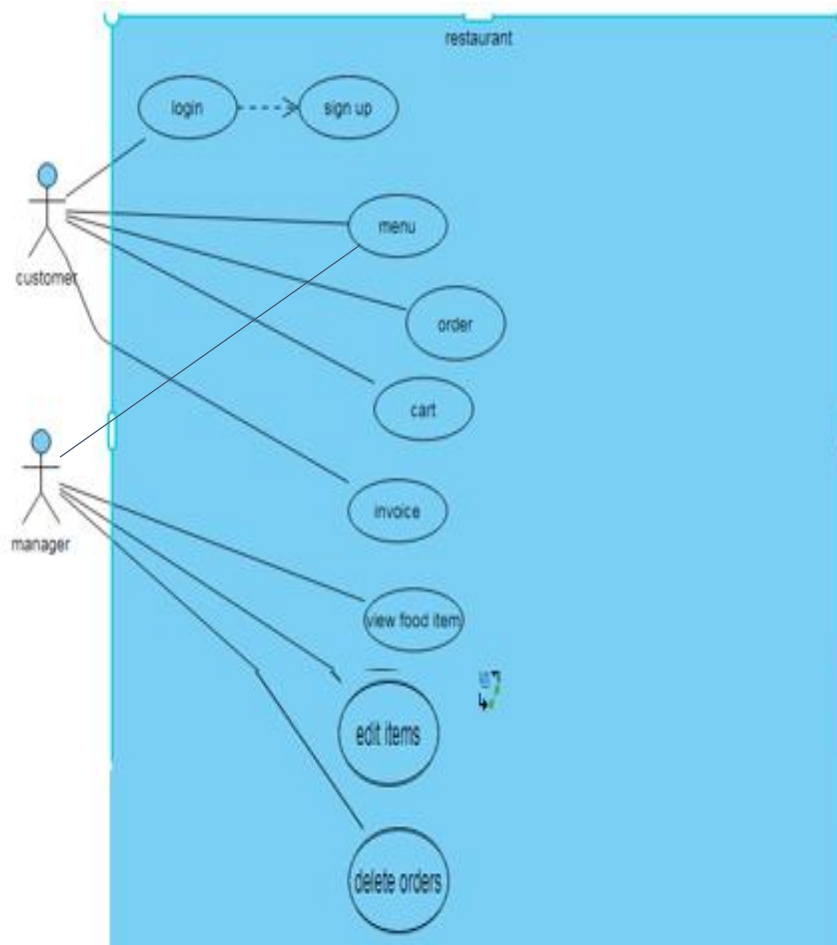

## Software Design:

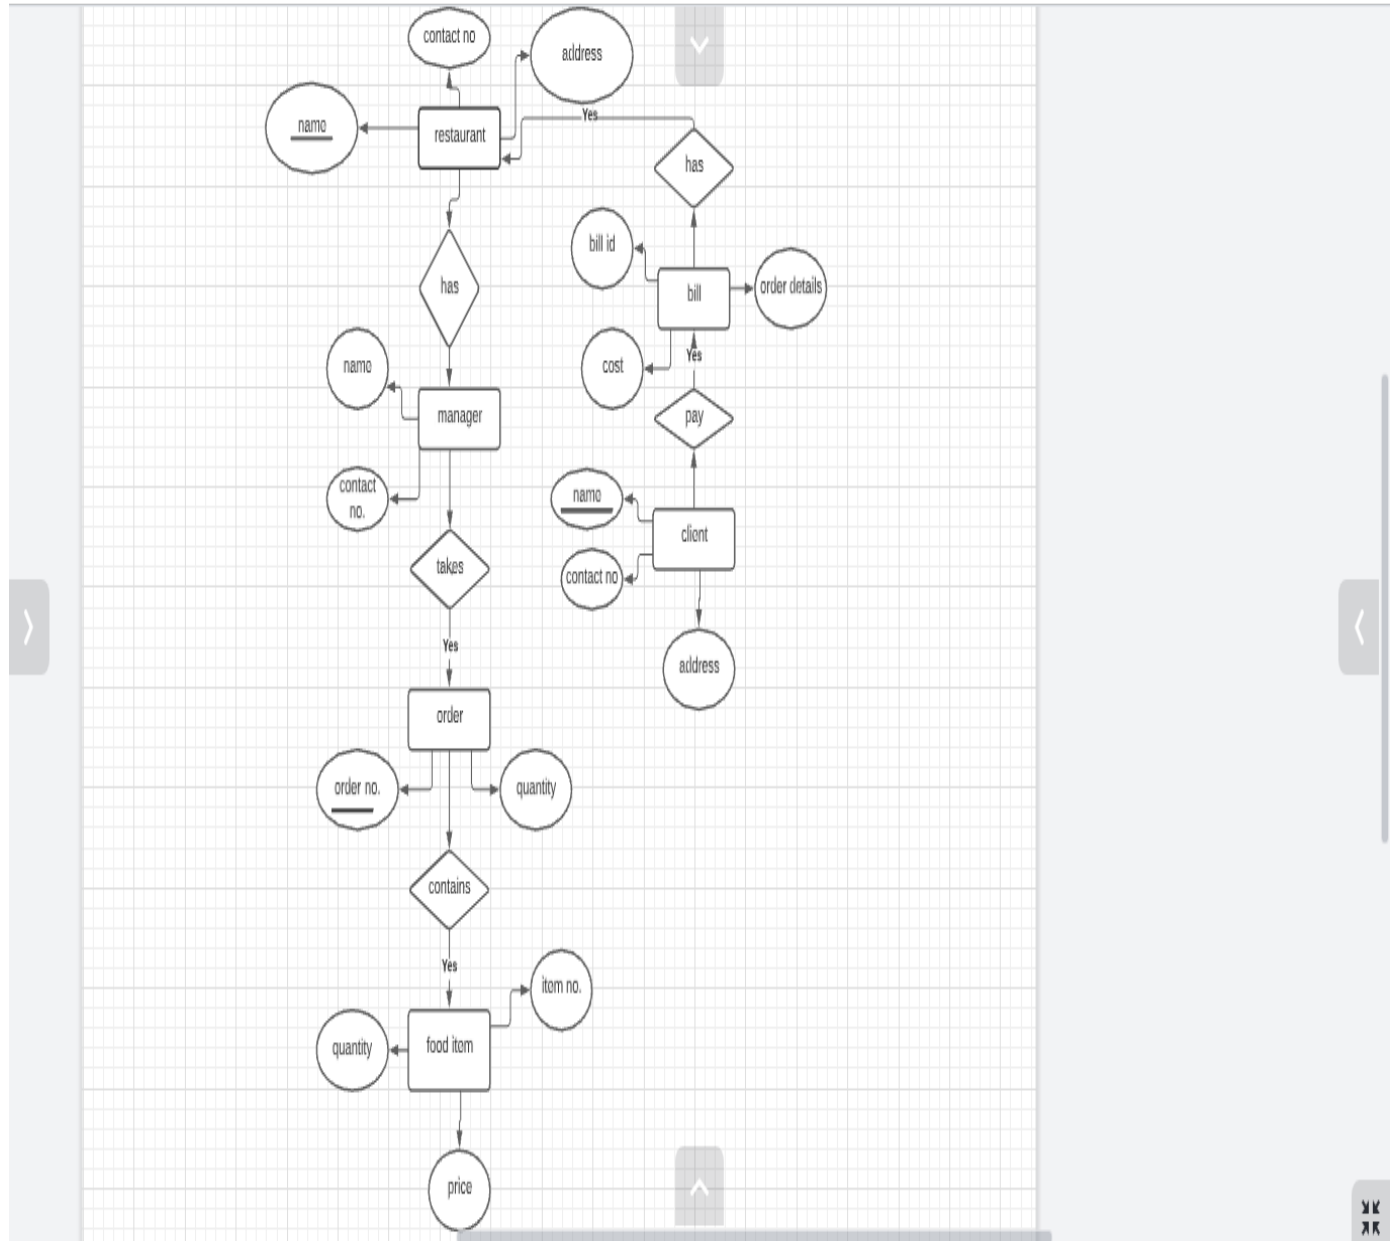

### Data flow diagram:

## USER CASE DIAGRAM:

# ER DIAGRAM

## Implementation and User Interface:

**Part 1:** To build the Restaurant Management System.

With the use of Visual studio code, we created a web application. Now with the help of Xampp server open web application in your browser now we have to create an a customer

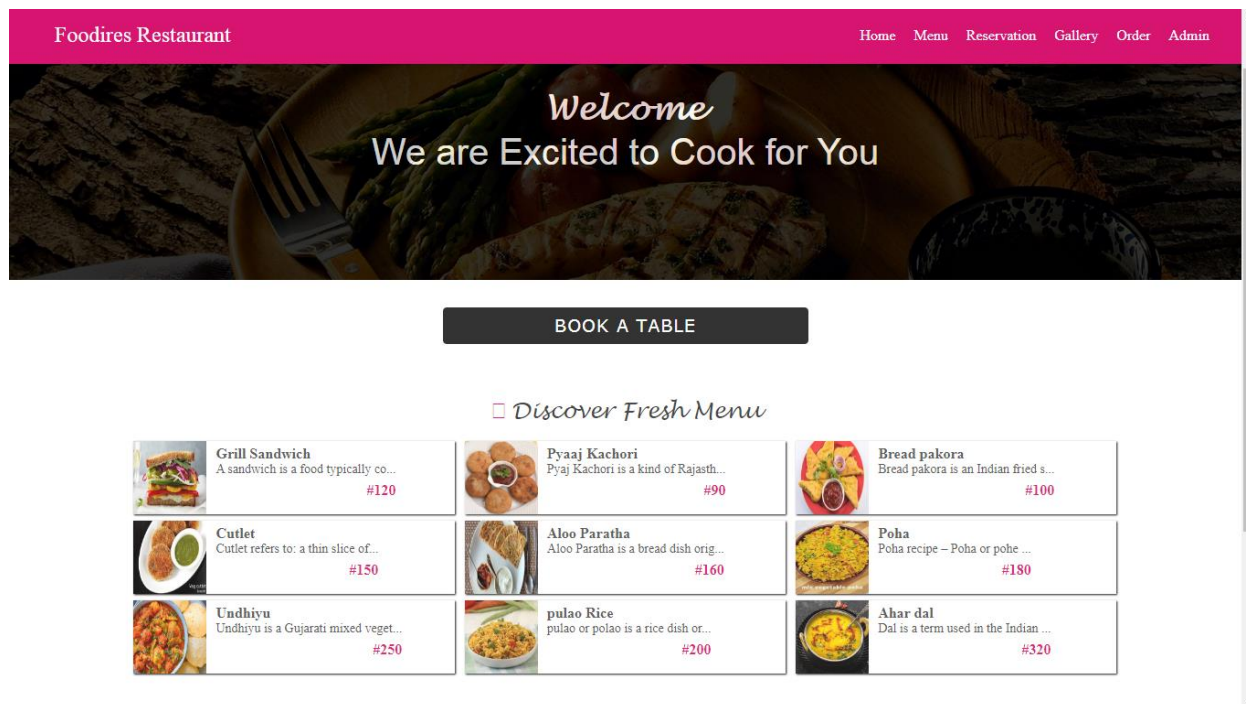

**Part 2:** Welcome to home page of Foodires.

**Part 3:** Then select food whichever you like by simply clicking on the icon of the food item.

**Part 4:** After that move ahead towards the cart and select quantity and pay book your order.

**Part 5:** Finally order will be booked successfully.

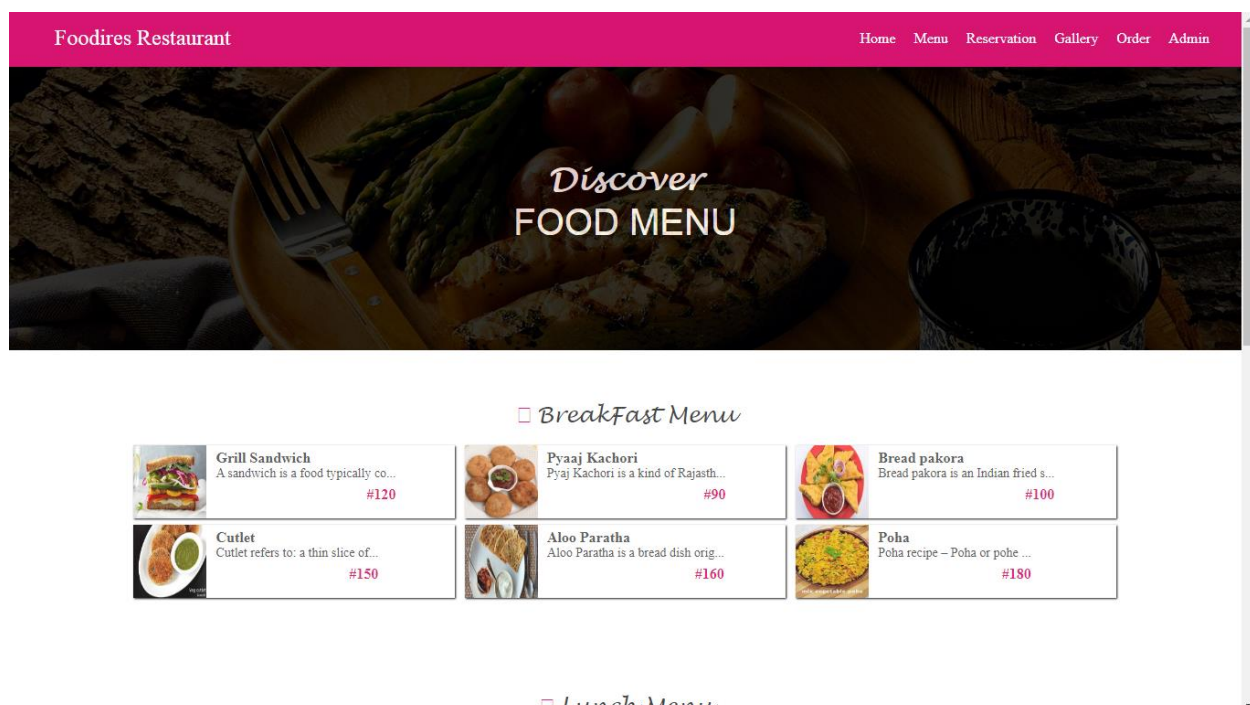

### 1. Home page

It shows the welcome message and menu to start with our delicious food.

It having list of food items on the very first page of the website that our foodie client wants to eat.

## 2. Menu Page

It shows the welcome message and menu to start with our delicious food.

It having list of food items on the basis of four category: - breakfast, lunch, dinner, special category.
